

# PRODUCT OF THE MONTH INDEPENDENT / APRIL SLATE CUTTER C/W HOLE PUNCH

MAKE SURE YOUR ROOFING PROJECT GETS A **PROFESSIONAL FINISH**

## SLATE CUTTER PROVIDES TWO TOOLS FOR THE PRICE OF ONE

This month we are welcoming the professional slate cutter to our ancillaries range.

The slate cutter is an innovative tool from EDMA, designed to make the lives of professional roofers easier when fitting slate roofing. The easy-to-use device can cut slates of up to 7mm in size and punch holes for nails to secure slates in place.

### BENEFITS

Accuracy and saving on potential losses, due to breakage while cutting are the key features of this handy tool. Plus it can punch accurate holes with ease.

Alongside this, the slate cutter is extremely easy to use and comes with a spare set of blades and hole puncher with hours of use available.

### WHEN TO USE

- To cut roofing slates to size
- To punch holes in slate

### HOW TO USE

- **For resizing slate:** Simply use to cut along as you would with a pair of scissors on paper
- **For holes:** Secure puncher into place and press
