

PRODUCT OF THE MONTH / JULY

HAMMER BELT LOOP

MAKE SURE YOUR ROOFING PROJECT GETS A **PROFESSIONAL FINISH**

OUR FULL PRODUCT RANGE

GO HANDS-FREE WITH YOUR HAMMER

Getting up and down a ladder with all the tools needed for a roofing job is no easy task. One tool roofers definitely don't want to mislay is the hammer. That's why the hammer belt loop is the ultimate convenience product for professional roofers; it allows owners to safely transport their hammer while keeping their hands free.

BENEFITS

Sliding easily onto any size belt, the hammer belt loop will also hold any size hammer and secure it firmly in place with a plated steel loop. This will help roofers to safely move around with their hammer always by their side, and will mean they are less likely to mislay it.

Not only a convenient product, the loop is also high quality. Made out of full hide leather, it is durable and as long lasting as the very roofs it will be helping installers safely work on.

WHEN TO USE

On any job where a hammer is required.

HOW TO USE

- Fits any size belt and hammer
- Slide onto belt wherever feels most comfortable
- Secure belt buckle and then fit hammer into steel loop
